SKILLS

DEVELOPMENT
Python, JavaScript, Node.js, HTML/CSS, SQL

TOOLS
Git, PyQt, QGIS, AI coding tools

AREAS
Applications, automation, data processing and visualisation, mapping

SOFT SKILLS

Autonomy

Teamwork

Discipline and consistency

LANGUAGES

French	Native
Spanish	B2
English	B1

INTERESTS

Former high-level swimmer: French Elite Championships, medals at the French Junior Championships

Triathlon, tennis

PROFILE

4th-year computer science engineering student on a work-study programme. I build software: applications, automation tools and data tools, mainly in Python and Node.js. Used to working independently from a goal, and in teams on school projects.

EXPERIENCE

Apprentice software engineer
May 2025 – present

Établissement Géographique Interarmées · French Armed Forces geospatial agency · internship, then apprenticeship

- Built an indexed search tool that cut file search time from 5–15 minutes to under a second (Python, PyQt).
- Developed QGIS plugins and interactive maps with charts and data export.
- Created automation tools to remove repetitive steps from data processing.
- Worked independently: needs analysis, development, then iteration with users.

IT assistant · internship
May – June 2024

Lumileds · Suresnes, France

Lifeguard
2023 – 2025

Ozoir-la-Ferrière swimming pool · alongside my studies

- Pool supervision and public safety.

EDUCATION

Engineering degree in computer science
2025 – 2028

CESI École d'Ingénieurs (France) · work-study programme

- Team projects: project management, software design and development.

BUT in computer science (Bachelor of Technology)
2022 – 2025

IUT de Champs-sur-Marne · Université Gustave Eiffel (France)
